

SewingTer

Daniel Lu Copy Right

Brief:

SewingTer is the next generation, revolutionary peripheral of PC, home IT sewing appliance. Not only can it assist professional tailors and dressmakers to do their regular embroidery work, but also it can help amateurs easily finish an outstanding, unique sewing artwork by just a click of mouse!

Features:

Controlled by a PC, Same size as a small PC printer. Powerful easy-to-use software (**RasVector** <http://dan59314.myweb.hinet.net>) for Microsoft Windows OS, with image filters and effects to help user get unique, interesting and creative work of art. Embroidery is created as easy as printing on paper. Setting up **SewingTer** is just as easy as a normal printer.

Since **RasVector** has many image filters and effects, you can always produce new and interesting artwork. Once your image is ready, you convert it to Vector data and click [Sewing] to output to **SewingTer**.

Hardware:

- I Compact, lightweight.
